

What bugs me about my EHR?
I'm a doctor, not a typist!

WebChartMD combines
the speed and efficiency of
traditional dictation with the
power of your EHR.

Visit WebChartMD.com/patientsfirst for a 5-minute self-guided demo that will make you smile.

Clinical documentation made easy.

WebChartMD lets your providers focus their time on what they do best—caring for patients.

WebChartMD makes clinical documentation easy. Healthcare providers dictate via recorder or telephone, notes are transcribed by your team (or by one of the 100+ transcription companies using WebChartMD) and interfaced directly into your EHR.

No EHR yet? Use WebChartMD to review & edit documents, auto-fax, e-sign, search online archives and much more—all from your online account.

Plus, with WebChartMD Cloud Service, there are no servers to buy, no hardware to install, no maintenance contracts, no service fees.
